3.2 Summary

In this project we take a look at the data management regarding the gut-liver axis.

We are doing this focusing on three aspects: **Aim 1** is very important and secondly we are working on full filling everything for **Aim 2**. At the end we will have completed all aims, including **Aim 3**.

Here we start a new paragraph after a complete empty line in the editor and this starts a new line in the editor but it is continuously written in the pdf.

3.3 Project progress to date

3.3.1 Report and current state of research

We have done great things in the previous funding period and will do even more great things in the upcoming period.

There is also the possibility to use certain commands by accessing the databases: Referring to a PI, like **Armin Baiwald**, or simply **Baiwald**. But what about the **Baiwald group**? 3.4 Project plan

In the upcoming funding period we focus on three aims:

Aim 1: Updating DataManagementPlans for each project and create DMPs for new funded projects in CRC XXX.

Aim 2: Onboarding clinical projects to the Electronic Labjournal *eLabJournal*.

Aim 3: Establish data processing workflows for analyses and archival purposes using Cosine (<https://coscine.de>).

WP 1: Data Management Plans

This workpackage is very important and therefor it is subdivided into **WPs 1a** and **1b**.

But we will also include parts of it in **WP 2**.
